

WCAG 2.0, 2.1, and 2.2 - Levels A, AA, and AAA

WCAG 2.0, 2.1, and 2.2 - Levels A, AA, and AAA

| Criteria                                                                                                                                     | Conformance Level  | Remarks and Explanations                                                                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.1.1 Non-text Content (Level A)                                                                                                             | Supports           | Synthetic union evidence for SC 1.1.1 across the declared WCAG scope.                                                                                                               |
| 1.2.1 Audio-only and Video-only (Prerecorded) (Level A)                                                                                      | Partially Supports | Synthetic union evidence for SC 1.2.1 across the declared WCAG scope.                                                                                                               |
| 1.2.2 Captions (Prerecorded) (Level A)                                                                                                       | Does Not Support   | Synthetic union evidence for SC 1.2.2 across the declared WCAG scope.                                                                                                               |
| 1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)                                                                         | Not Applicable     | Synthetic union evidence for SC 1.2.3 across the declared WCAG scope.                                                                                                               |
| 1.2.4 Captions (Live) (Level AA)                                                                                                             | Supports           | Synthetic union evidence for SC 1.2.4 across the declared WCAG scope.                                                                                                               |
| 1.2.5 Audio Description (Prerecorded) (Level AA)                                                                                             | Partially Supports | Synthetic union evidence for SC 1.2.5 across the declared WCAG scope.                                                                                                               |
| 1.2.6 Sign Language (Prerecorded) (Level AAA)                                                                                                | Does Not Support   | Synthetic union evidence for SC 1.2.6 across the declared WCAG scope.                                                                                                               |
| 1.2.7 Extended Audio Description (Prerecorded) (Level AAA)                                                                                   | Not Applicable     | Synthetic union evidence for SC 1.2.7 across the declared WCAG scope.                                                                                                               |
| 1.2.8 Media Alternative (Prerecorded) (Level AAA) Also applies to: EN 301 549 Criteria 9.1.1.1 (Web) Revised Section 508 501 (Web)(Software) | Supports           | Synthetic union evidence for SC 1.2.8 across the declared WCAG scope.                                                                                                               |
| 1.2.9 Audio-only (Live) (Level AAA)                                                                                                          | Partially Supports | Synthetic union evidence for SC 1.2.9 across the declared WCAG scope.                                                                                                               |
| 1.3.1 Info and Relationships (Level A)                                                                                                       | Does Not Support   | Synthetic wrapped union evidence for SC 1.3.1 exercises a variable-height row with enough literal detail to wrap across multiple visual lines without changing the source evidence. |
| 1.3.2 Meaningful Sequence (Level A)                                                                                                          | Not Applicable     | Synthetic union evidence for SC 1.3.2 across the declared WCAG scope.                                                                                                               |
| 1.3.3 Sensory Characteristics (Level A)                                                                                                      | Supports           | Synthetic union evidence for SC 1.3.3 across the declared WCAG scope.                                                                                                               |
| 1.3.4 Orientation (Level AA 2.1 and 2.2)                                                                                                     | Partially Supports | Synthetic union evidence for SC 1.3.4 across the declared WCAG scope.                                                                                                               |
| 1.3.5 Identify Input Purpose (Level AA 2.1 and 2.2)                                                                                          | Does Not Support   | Synthetic union evidence for SC 1.3.5 across the declared WCAG scope.                                                                                                               |
| 1.3.6 Identify Purpose (Level AAA 2.1 and 2.2)                                                                                               | Not Applicable     | Synthetic union evidence for SC 1.3.6 across the declared WCAG scope.                                                                                                               |
| 1.4.1 Use of Color (Level A)                                                                                                                 | Supports           | Synthetic union evidence for SC 1.4.1 across the declared WCAG scope.                                                                                                               |
| 1.4.2 Audio Control (Level A) Also applies to: EN 301 549 Criteria 9.1.1.1 (Web) Revised Section 508 501 (Web)(Software)                     | Partially Supports | Synthetic union evidence for SC 1.4.2 across the declared WCAG scope.                                                                                                               |
| 1.4.3 Contrast (Minimum) (Level AA)                                                                                                          | Does Not Support   | Synthetic union evidence for SC 1.4.3 across the declared WCAG scope.                                                                                                               |
| 1.4.4 Resize Text (Level AA)                                                                                                                 | Not Applicable     | Synthetic union evidence for SC 1.4.4 across the declared WCAG scope.                                                                                                               |
| 1.4.5 Images of Text (Level AA)                                                                                                              | Supports           | Synthetic union evidence for SC 1.4.5 across the declared WCAG scope.                                                                                                               |
| 1.4.6 Contrast (Enhanced) (Level AAA)                                                                                                        | Partially Supports | Synthetic wrapped union evidence for SC 1.4.6 exercises a variable-height row with enough literal detail to wrap across multiple visual lines without changing the source evidence. |
| 1.4.7 Low or No Background Audio (Level AAA)                                                                                                 | Does Not Support   | Synthetic union evidence for SC 1.4.7 across the declared WCAG scope.                                                                                                               |
| 1.4.8 Visual Presentation (Level AAA)                                                                                                        | Not Applicable     | Synthetic union evidence for SC 1.4.8 across the declared WCAG scope.                                                                                                               |
| 1.4.9 Images of Text (No Exception) (Level AAA)                                                                                              | Supports           | Synthetic union evidence for SC 1.4.9 across the declared WCAG scope.                                                                                                               |
| 1.4.10 Reflow (Level AA 2.1 and 2.2)                                                                                                         | Partially Supports | Synthetic union evidence for SC 1.4.10 across the declared WCAG scope.                                                                                                              |
| 1.4.11 Non-text Contrast (Level AA 2.1 and 2.2) Also applies to: EN 301 549 Criteria 9.1.1.1 (Web) Revised Section 508 501 (Web)(Software)   | Does Not Support   | Synthetic union evidence for SC 1.4.11 across the declared WCAG scope.                                                                                                              |
| 1.4.12 Text Spacing (Level AA 2.1 and 2.2)                                                                                                   | Not Applicable     | Synthetic union evidence for SC 1.4.12 across the declared WCAG scope.                                                                                                              |
| 1.4.13 Content on Hover or Focus (Level AA 2.1 and 2.2)                                                                                      | Supports           | Synthetic union evidence for SC 1.4.13 across the declared WCAG scope.                                                                                                              |
| 2.1.1 Keyboard (Level A)                                                                                                                     | Partially Supports | Synthetic union evidence for SC 2.1.1 across the declared WCAG scope.                                                                                                               |

| Criteria                                                                                                                                             | Conformance Level  | Remarks and Explanations                                                                                                                                                             |
|------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2.1.2 No Keyboard Trap (Level A)                                                                                                                     | Does Not Support   | Synthetic union evidence for SC 2.1.2 across the declared WCAG scope.                                                                                                                |
| 2.1.3 Keyboard (No Exception) (Level AAA)                                                                                                            | Not Applicable     | Synthetic union evidence for SC 2.1.3 across the declared WCAG scope.                                                                                                                |
| 2.1.4 Character Key Shortcuts (Level A 2.1 and 2.2)                                                                                                  | Supports           | Synthetic wrapped union evidence for SC 2.1.4 exercises a variable-height row with enough literal detail to wrap across multiple visual lines without changing the source evidence.  |
| 2.2.1 Timing Adjustable (Level A)                                                                                                                    | Partially Supports | Synthetic union evidence for SC 2.2.1 across the declared WCAG scope.                                                                                                                |
| 2.2.2 Pause, Stop, Hide (Level A)                                                                                                                    | Does Not Support   | Synthetic union evidence for SC 2.2.2 across the declared WCAG scope.                                                                                                                |
| 2.2.3 No Timing (Level AAA) Also applies to: EN 301 549 Criteria 9.1.1.1 (Web) Revised Section 508 501 (Web)(Software)                               | Not Applicable     | Synthetic union evidence for SC 2.2.3 across the declared WCAG scope.                                                                                                                |
| 2.2.4 Interruptions (Level AAA)                                                                                                                      | Supports           | Synthetic union evidence for SC 2.2.4 across the declared WCAG scope.                                                                                                                |
| 2.2.5 Re-authenticating (Level AAA)                                                                                                                  | Partially Supports | Synthetic union evidence for SC 2.2.5 across the declared WCAG scope.                                                                                                                |
| 2.2.6 Timeouts (Level AAA 2.1 and 2.2)                                                                                                               | Does Not Support   | Synthetic union evidence for SC 2.2.6 across the declared WCAG scope.                                                                                                                |
| 2.3.1 Three Flashes or Below Threshold (Level A)                                                                                                     | Not Applicable     | Synthetic union evidence for SC 2.3.1 across the declared WCAG scope.                                                                                                                |
| 2.3.2 Three Flashes (Level AAA)                                                                                                                      | Supports           | Synthetic union evidence for SC 2.3.2 across the declared WCAG scope.                                                                                                                |
| 2.3.3 Animation from Interactions (Level AAA 2.1 and 2.2)                                                                                            | Partially Supports | Synthetic union evidence for SC 2.3.3 across the declared WCAG scope.                                                                                                                |
| 2.4.1 Bypass Blocks (Level A)                                                                                                                        | Does Not Support   | Synthetic union evidence for SC 2.4.1 across the declared WCAG scope.                                                                                                                |
| 2.4.2 Page Titled (Level A)                                                                                                                          | Not Applicable     | Synthetic wrapped union evidence for SC 2.4.2 exercises a variable-height row with enough literal detail to wrap across multiple visual lines without changing the source evidence.  |
| 2.4.3 Focus Order (Level A) Also applies to: EN 301 549 Criteria 9.1.1.1 (Web) Revised Section 508 501 (Web)(Software)                               | Supports           | Synthetic union evidence for SC 2.4.3 across the declared WCAG scope.                                                                                                                |
| 2.4.4 Link Purpose (In Context) (Level A)                                                                                                            | Partially Supports | Synthetic union evidence for SC 2.4.4 across the declared WCAG scope.                                                                                                                |
| 2.4.5 Multiple Ways (Level AA)                                                                                                                       | Does Not Support   | Synthetic union evidence for SC 2.4.5 across the declared WCAG scope.                                                                                                                |
| 2.4.6 Headings and Labels (Level AA)                                                                                                                 | Not Applicable     | Synthetic union evidence for SC 2.4.6 across the declared WCAG scope.                                                                                                                |
| 2.4.7 Focus Visible (Level AA)                                                                                                                       | Supports           | Synthetic union evidence for SC 2.4.7 across the declared WCAG scope.                                                                                                                |
| 2.4.8 Location (Level AAA)                                                                                                                           | Partially Supports | Synthetic union evidence for SC 2.4.8 across the declared WCAG scope.                                                                                                                |
| 2.4.9 Link Purpose (Link Only) (Level AAA)                                                                                                           | Does Not Support   | Synthetic union evidence for SC 2.4.9 across the declared WCAG scope.                                                                                                                |
| 2.4.10 Section Headings (Level AAA)                                                                                                                  | Not Applicable     | Synthetic union evidence for SC 2.4.10 across the declared WCAG scope.                                                                                                               |
| 2.4.11 Focus Not Obscured (Minimum) (Level AA 2.2 only)                                                                                              | Supports           | Synthetic union evidence for SC 2.4.11 across the declared WCAG scope.                                                                                                               |
| 2.4.12 Focus Not Obscured (Enhanced) (Level AAA 2.2 only) Also applies to: EN 301 549 Criteria 9.1.1.1 (Web) Revised Section 508 501 (Web)(Software) | Partially Supports | Synthetic union evidence for SC 2.4.12 across the declared WCAG scope.                                                                                                               |
| 2.4.13 Focus Appearance (Level AAA 2.2 only)                                                                                                         | Does Not Support   | Synthetic wrapped union evidence for SC 2.4.13 exercises a variable-height row with enough literal detail to wrap across multiple visual lines without changing the source evidence. |
| 2.5.1 Pointer Gestures (Level A 2.1 and 2.2)                                                                                                         | Not Applicable     | Synthetic union evidence for SC 2.5.1 across the declared WCAG scope.                                                                                                                |
| 2.5.2 Pointer Cancellation (Level A 2.1 and 2.2)                                                                                                     | Supports           | Synthetic union evidence for SC 2.5.2 across the declared WCAG scope.                                                                                                                |
| 2.5.3 Label in Name (Level A 2.1 and 2.2)                                                                                                            | Partially Supports | Synthetic union evidence for SC 2.5.3 across the declared WCAG scope.                                                                                                                |
| 2.5.4 Motion Actuation (Level A 2.1 and 2.2)                                                                                                         | Does Not Support   | Synthetic union evidence for SC 2.5.4 across the declared WCAG scope.                                                                                                                |
